BJC

Iris Plus

Balance that inspires

“ A combination of shapes that deliver an eclectic design.
A new linear frame that perfectly combines the curved
shape of the switch and the pleasant feel of the
mechanism in the Iris range.

Iris Plus

Style and elegance

We all see and interpret spaces differently. That's why we're introducing the new Iris Plus. This new option features a straight-line frame and now joins the hundreds of possibilities already offered by the standard IRIS series.

“ A very popular concept in the residential and tertiary sectors.

“ *The Iris and Iris Plus series are made from Urea, a thermosetting and self-extinguishing resin. Their thermosetting properties provide exceptional surface hardness, resistance to heat and fading from UV rays and chemical agents. They are also excellent electrical insulators.* ”

- Wireless. Installed and extended without the need for building work.
- Control via a smartphone, tablet, the cloud, from both inside and outside the home.
- **Made in Europe** according to strict quality standards and European regulations, allowing us to provide a 5-year warranty.
- Compatible with Google Nest and Alexa voice assistants.
- Control it using the free BJC Nexus app, as well as the Google Home and Amazon Alexa apps.
- Can be integrated with Home Assistant.
- Cloud located on **servers in Europe** with European cybersecurity and data protection standards.
- You can combine the modules with any model in the BJC series to get your home connected.

Combine the modules with the Iris Plus series to get your home connected.

BJC Nexus Cloud located in Europe

Download the BJC Nexus app

“

The BJC Nexus system provides full, easy control of your home from your mobile device using the dedicated app, as well as through compatible voice assistants such as Alexa or Google Home.

Iris Plus

Accuracy and reliability

Socket outlets,
with the speed and safety
of the STAI system

MEC 18 switches

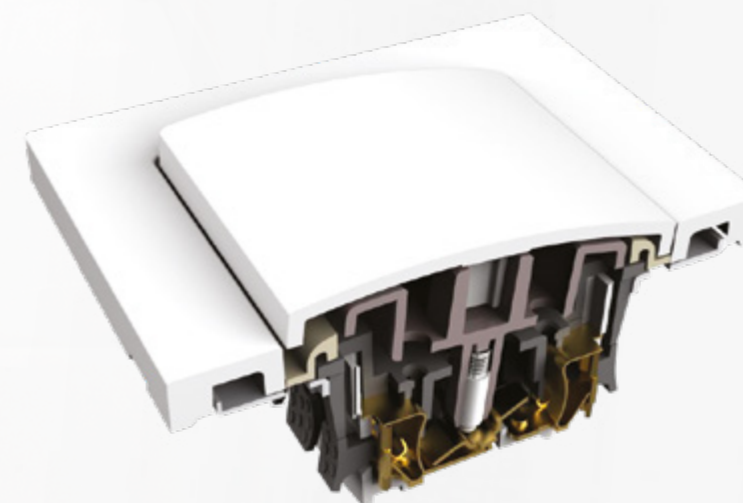

“ The high resistance of urea to wear and tear, coupled with the fact that BJC mechanisms effortlessly meet or exceed current regulatory requirements for contact operations, ensures that BJC series products have an extended useful life.

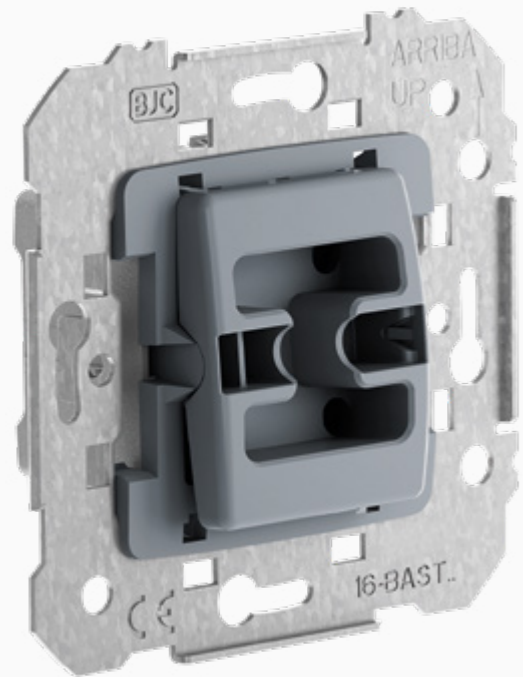

Iris Plus

Component quality

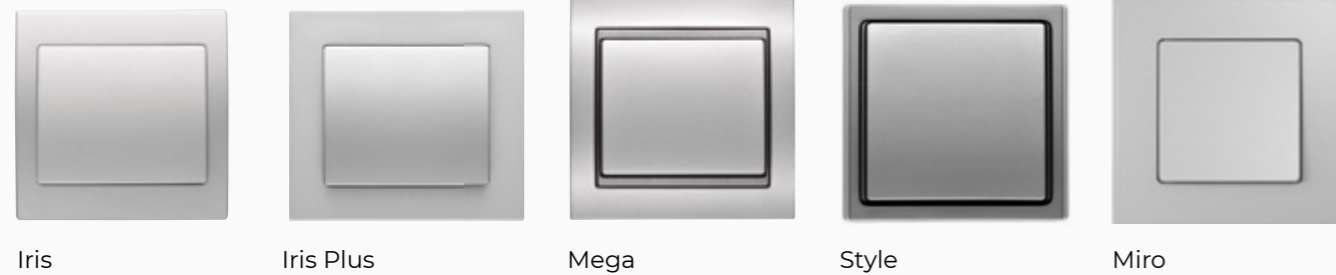

The high quality of all the components, such as the silver contacts with the highest purity, enables us to offer 16 A in each one-way switch mechanism. We can also guarantee that they will far exceed the minimum changeover requirements required by current regulations before we take them to market.

“ *The series features a flat surface frame and right angles for a sober and modern aesthetic. This design contrasts harmoniously with the soft curvature of the switch, creating a balanced and attractive visual effect.* ”

MEC 18

One single mechanism is suitable for all five luxury BJC series: Iris, Iris Plus, Mega, Style and Miro.

Iris

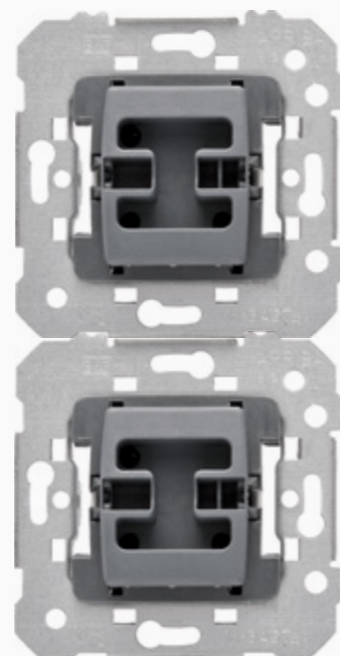

Iris Plus

Mega

Style

Miro

- ▷ Our 16A MEC18 one-way and two-way switches allow for a large number of applications using the same mechanism, reducing the number of items and references you need to stock.
- ▷ The galvanised steel fixing frames are treated to prevent corrosion and ensure durable installation components.
- ▷ Fixing frames with top and bottom profiles make assembly easier and ensure that the mechanisms in multiple frames are correctly aligned.

Iris Plus

Antibacterial solutions

Thanks to their antibacterial finish, Iris and Iris Plus impede the survival and transmission of microorganisms. This makes them the perfect choice for environments in which microorganisms thrive and the risk of transmission is high, such as hospitals, care homes, residential homes, care centres and communal areas in offices or homeowners' associations.

“

It impedes the survival and transmission of microorganisms

Iris Plus

Many different functions

Smart Home
Combining BJC Nexus modules to get your home connected.

1 RJ and fibre-optic sockets
This allows the fibre-optic cable to reach the required location and enables the router to be easily connected.

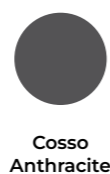

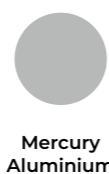

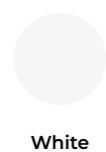

2 Dimmers
Dimmers are the perfect way to create an atmosphere in rooms by adjusting the lighting levels to the desired intensity.

3 IP44 protection
In all colours and frames. Same mechanism and frame as the IP20.

4 Motion detector
This practical and convenient safety solution also cuts costs.

5 Centralised blind control
Allows all blinds to be raised or lowered with a single push-button, individually or together.

6 Dual USB chargers
USB Type A and C with fast charging and Power Delivery.

7 LED indicator light
They allow you to illuminate: stairs, waiting rooms, interiors, corridors and calls.

8 Multimedia
HDMI, VGA, RJ45, stereo, etc. connectors for a clean and cable-free installation. Ideal for homes and businesses.

9 Thermostats
Our thermostats can be used to control and adjust the temperature in each room.

“The Iris Plus series offers a wide range of functions to meet today's needs. These include light intensity dimmers, sound controllers, and mechanisms for raising and lowering blinds.”

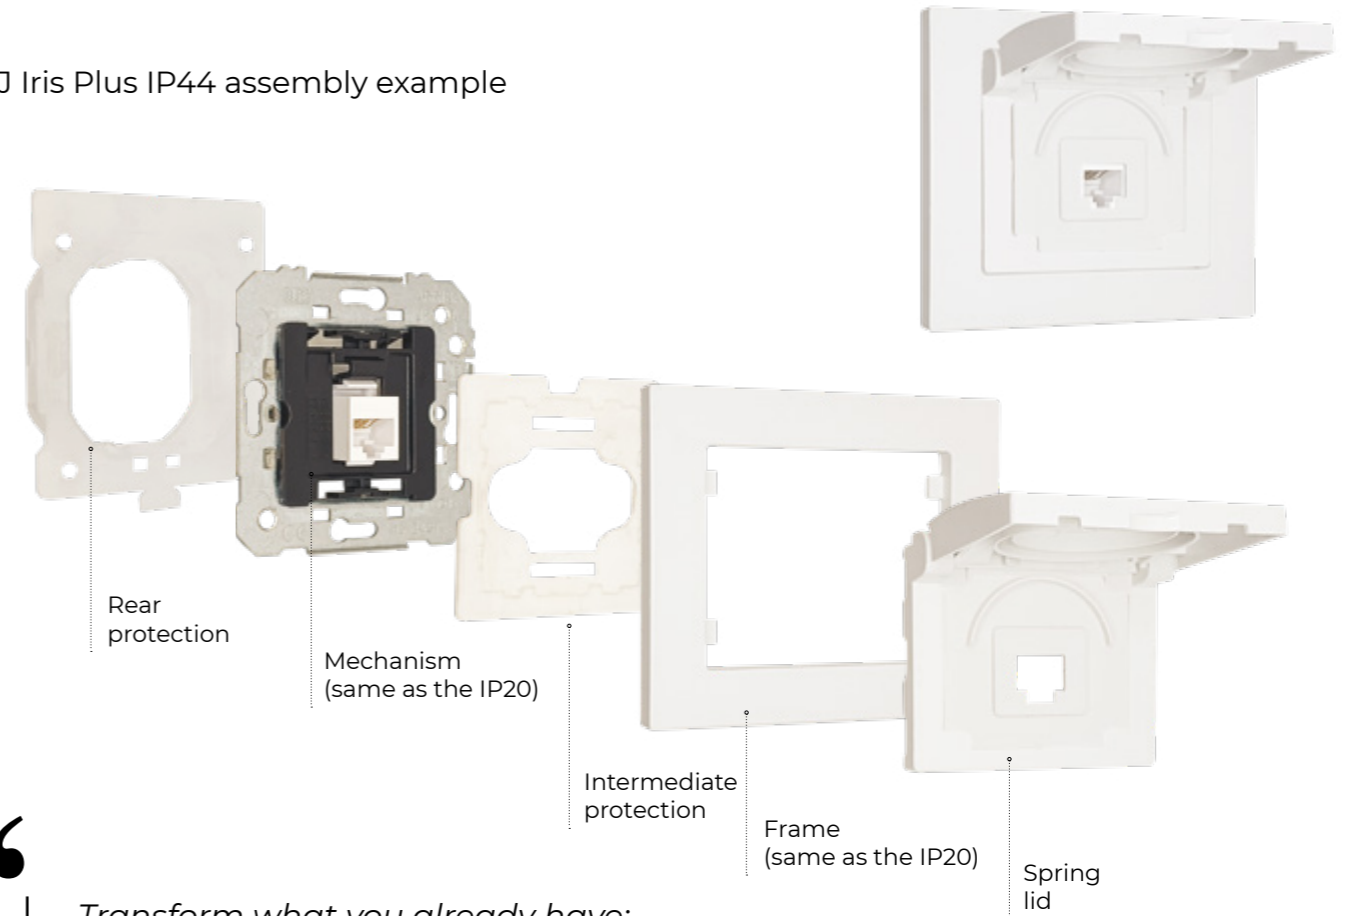

Iris Plus IP44

Now also for outdoor use

- ▷ In all colours and frames.
- ▷ Schuko® socket outlet, single and double mechanism, TV and RJ.
- ▷ A single common IP20 frame from the same series.
