What makes our Schuko® HUB-CAP charger plug (18524-USBC) so special

ASSEMBLY IN A STANDARD FLUSH-MOUNTING BOX

is that it can be assembled in a standard flush-mounting box, with no need for additional depth.

POWER DELIVERY

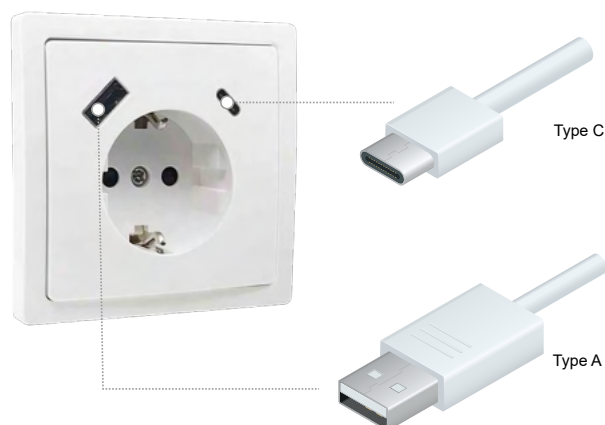

This fast-charging device is compatible with both the Power Delivery and Quick Charge protocols. This enables users to adjust the output voltage according to the battery charge level, thereby reducing the charging time.

From the end of 2024, this charging protocol will be mandatory for all mobile devices on the market that have fast-charging capabilities. (Directive (EU) 2022/2380).

COMPLIANT WITH THE MARKET'S STRICTEST STANDARDS

It complies with the German power socket standard VDE 6020-1, UNE 20315, and the European standard EN 62368-1. It also complies with ErP regulations.

FAST CHARGING USB CHARGER (TYPES A AND C) IN ACCORDANCE WITH REGULATIONS

Available in most BJC series and finishes.

Make the most of your space by easily and quickly replacing your current outlet with a dual USB charger socket.

Your devices are protected. This dual USB charger is protected against overheating and overloading.

Fast charging output profiles: Fast charging output profiles: 5V/3A, 9V/2.22A and 12V/1.67A for a single device in fast charging mode. When two devices are charging, the current is divided between them and can be as high as 3.4A.

ECO-EFFICIENT

Its standby power consumption is lower than required by the European energy efficiency directive (ErP).
